Work experience

Network Operations Intern | Broadlink Network and Communications Limited | 2024/07/01 - 2025/01/02 | Lalitpur, Nepal

- Monitored ISP network performance and system stability
- Assisted in troubleshooting connectivity and network issues
- Supported configuration of routers, switches, and customer premises equipment (CPE)
- Maintained network infrastructure under supervision of Network Operations Center (NOC) team
- Documented incidents and operational logs
- Coordinated with technical team members to ensure uninterrupted internet service delivery
- Gained exposure to real-world ISP operations and network management workflows

Backend Development Intern | Wisdom Technologies Private Limited | 2025/02/01 - 2026/02/02 | Kathmandu, Nepal

- Developed backend systems using MERN stack technologies
- Designed and implemented RESTful APIs for web applications
- Worked with MongoDB for database design, management, and optimization
- Built and maintained Node.js and Express.js server-side applications
- Contributed to scalable backend architecture and system performance improvements
- Collaborated with frontend developers and team members in agile development cycles
- Participated in debugging, code reviews, and technical discussions
- Strengthened understanding of backend engineering and full-stack system integration

Education

Bachelors of Science in Computer Science and Information Technology | 2021-2024

Tribhuvan University
Lalitpur, Nepal

Higher Secondary Education (+2) - Computer Science | 2018-2020

National Education Board
Lalitpur, Nepal

Projects

Secure API Marketplace Backend System |

- Designed and implemented a secure backend platform with JWT-based authentication, role-based access control (RBAC), and rate limiting to manage tiered API subscriptions.
- Integrated Redis for session and quota management and background job processing to improve scalability and system performance.

<https://github.com/niphio/>

Role-Based Bug Tracking Backend System |

- Developed a RESTful backend system featuring JWT-based authentication, role-based access control, and secure issue lifecycle management.
- Optimized data retrieval using MongoDB with filtering, pagination, and access control enforcement. <https://github.com/niphio>

Food Quality Classification System Using Deep Learning |

- Implemented an image-based food quality classification system using Vision Transformer models and transfer learning techniques.
- Built an inference API using FastAPI, with consideration for data quality, model bias, and reliability limitations. <https://github.com/niphio>

reDrift: AI-Driven 2D Game with Pathfinding Algorithms |

- Designed and implemented AI-driven enemy behavior using A* pathfinding and algorithmic decision-making in a 2D environment.
- Applied performance optimization and system logic principles to support dynamic gameplay and narrative-driven interactions.

<https://github.com/niphio>

Skills

Technical Skills:

Frontend: ReactJS/ NextJS

Backend: NodeJS/ExpressJS, PostgreSQL/MongoDB

Game Dev: Godot Engine (GDScript), Unreal Engine (C++)

Scripting: Lua

Spoken Languages: Nepali, English, German

Certifications

Advanced Cybersecurity - Threat and Governance | Great Learning | Online | 2024/11/01
